# Embrace the future with **VIKING**

## Smartphones are outdated!

Wearable technology is evolving to target the consumer market. The most convenient technology is always the day's hottest topic.

INVESTOR

**VIKING** BRILLIANTSERVICE

## HMD OS for consumers

Even the least tech savvy can input with ease by visceral gestures.

MANUFACTURER

## App development in Objective-C

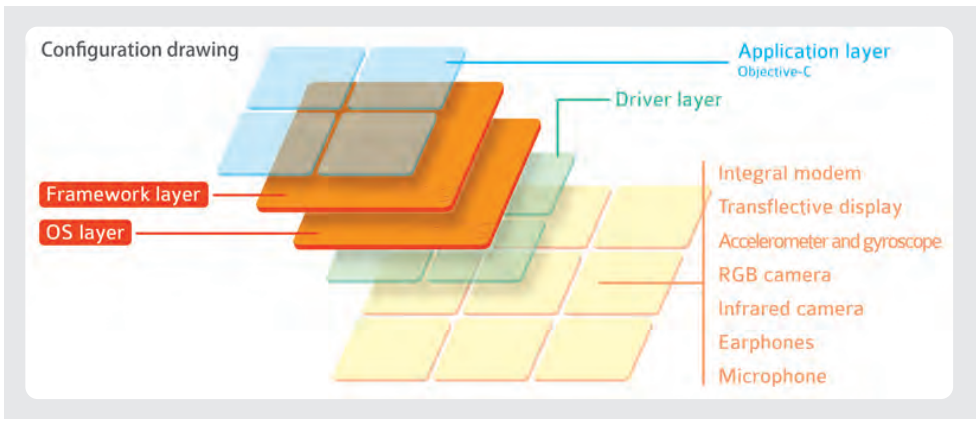

Objective-C is an elegant, fun and easy to program language that will speed up app development time several times compared to C or C++. Objective-C has for a long time been used in iOS and OSX but is steadily growing in popularity on other platforms thanks to the open source implementation of the Cocoa framework.

SOFTWARE VENDOR

Objective-C

Wearable computers are likely to replace smartphones and enhance communication & technology in everyday life. BRILLIANTSERVICE will announce a release of HMD OS, development environment and contents' billing system for consumers.
