

Printing a volta bracket saying *text*. The text can be specified as a text string or as a markup text, see [Formatting text](#). Do not forget to change the font, as the default number font does not contain alphabetic characters.

```
c1
d4 e f g
\override Staff.VoltaBracket #'font-name = #"sans"
\set Score.repeatCommands = #'( ( volta "1. Repeat to CHORUS" ) )
f4 g a b
\set Score.repeatCommands = #'( ( volta #f ) \text ( volta "2., 3. To VERSE" ) end-repeat )
g4 a g a
c1
```

Note: unless explicitly stopped as in the next example, the volta bracket will continue indefinitely.
