

## ■ Sustainability In Action ...

**Baker delivers sustainable solutions.**

**Training and munitions activities at former DoD installations have, until recently, rendered portions of these surplus military bases unusable. Under a unique program called Conservation Conveyance, the US Army, working with a conservation not-for-profit and Baker, has successfully conveyed over 61,500 acres of property at Camp Bonneville and Honey Lake to create recreational opportunities and wildlife habitat.**

**Baker is proud of our involvement in assisting the military on the first two Conservation Conveyance programs in the nation.**

# Baker

*Creating value by delivering  
innovative and sustainable solutions  
for infrastructure and the environment.*
