

Now, this is some text. Looks good. Now typeset the table. See following variables.

```
.f = 6  
.s = 12  
.v = 12000  
.i = 60000  
.l = 432000  
.L = 1  
.j = 1  
.u = 0  
.ce = 0
```

char	Unit
c	Centimeters
i	Inches
m	Ems
n	Ens
p	Points
P	Picas

Now see this text. Is it good size and shape? It is not. And see the variables again.

```
.f = 6  
.s = 10  
.v = 12000  
.i = 50000  
.l = 432000  
.L = 1  
.j = 1  
.u = 0  
.ce = 0
```

Something is either wrong, or I do not understand how to use *tbl*.

The groff used to get this PDF is version 1.22.3.
