

I am Darshan Kadu, a 4th-year student at VNIT, Nagpur, India. I am writing this letter to express my interest in doing an internship at Free Software Foundation for Feb-April session.

I have done Google Summer of Code 2017 under Blender organization. I worked on Blender software's vertex painting part. Added multiple features to the vertex painting which users were demanding from a long time. The main take away from this program is I got to know how the open source work, working with the large code base, doing a production level programming. Apart from this, I have done some amount of front-end work for two websites. I would like to use this experience for working on programming tasks during the internship.

I am excited to do an internship with Free Software Foundation, to work more on open source and free software.
